Subject: Formaldehyde ERC revisions implementation

Hi Samantha,

Please find attached a table that lays out the major ERC reviewer comments and how they are being addressed in the current draft formaldehyde assessment.

We hope that this will allow us to close out ERC review, but please let us know if you, the ERC reviewers, or others would like additional details or discussion.

Thank you,
Barbara and Andrew

P.S. Per our discussion, Barbara and I will be flagging sections in the current SharePoint version of the assessment where we still need to make significant changes (notes: the SharePoint version is continuously being refined and has track changes/ comments that are pending resolution; in some sections, a revised offline version is available and we are just making some final changes before dropping it into the SharePoint draft).
